

NAVARRO TILES

ENDLESS LUXURY

STRATOS

Inspired by the raw elegance of natural travertine, Stratos Cross captures the beauty of stone through a contemporary lens. This collection interprets the cross-cut of travertine, revealing soft clouds of mineral movement and layered tonal variation that feel organic, balanced and quietly striking. Gentle shifts in shade and texture create depth without overpowering a space, making Stratos Cross ideal for both calm, minimalist interiors and refined commercial environments.

Available in White, Bone and Mud, the palette moves from light and airy to warm and grounding, offering versatile design solutions that work effortlessly across floors and walls. The large-format 1200 × 600 porcelain tiles, finished in a smooth matt surface, enhance the sense of continuity while maintaining a tactile, contemporary feel.

To complete the look, matching décor tiles introduce added texture and visual interest, allowing designers to create feature walls, zoned areas or subtle focal points while remaining true to the collection's natural aesthetic.
